# Trail Talk

The hidden walk trail on this reserve is seasonally abundant in wildflowers, wattles, parrotbush & orchids.

It boasts fantastic views across the valley from the lookout at the top of the trail.

Apart from the formed walk trail there are also two firebreaks that can be traversed, with care. The firebreak to the west of the picnic area is relatively flat until reaching a steep hill.

It offers a wonderful wildflower viewing opportunity for those not inclined to tackle the steps of the traditional walk trail.
